

**ROBO POD
STARTER'S KIT**

The Robo Pod

The gear-grinding robots of the green Robo Pod are the most fearsome units in the game. What they lack in speed and maneuverability, they more than make up for in raw deconstructing power.

Strengths: Heavy deconstructing ability, plus green units keep on moving at lower levels

Weaknesses: Easily the slowest team in the game, making it difficult to score

Strategy tips: Don't be in a hurry. Take your time and make a slow march across the board, catching any opposing units that try and slip by. Green can work well with many units on the board at once.

Game Summary

In X-Pod Play Off, you and your opponent use your X-Pod bricks to build units, deploy them on the board, and the opposition. To win, be the first player to move 3 units all the way across the board to your opponent's side.

Setup

- 1) Select a board and get out your X-Pods.
- 2) Put your bricks down on your Inventory Sheet and find Plan Cards for the Robo Pod basic units: **AlphaBot**, **BrainBot**, **JumpBot**, **ExtendoBot**, **Patroller**, **Sparks**, **Fixit**, **Green Droid 2.0**.
- 3) Build any three units. If this is your very first game, build **AlphaBot**, **ExtendoBot**, and **Fixit**. Or try **JumpBot**, **ExtendoBot**, and **Patroller**. Or **BrainBot**, **Patroller**, and **Sparks**. Always build your units to their highest level.
- 4) Pick your three X-tra cards. If this is your very first game, pick the **Decon +1**, **Move +1**, and **Level +1** cards. Or you can pick any combination of those three X-Tra cards for your hand.
- 5) Flip any flat brick to see who goes first. The first player places his 3 units first on his home row. Then the second player places his units. The first player also takes the first turn. On your first turn, you will probably **ACTIVATE** one of the units that are already on your home row.

Quickstart Rules

Turn Sequence

Each turn you must do one of the following things:

- **BUILD** one unit to its maximum level and put it in your X-Pod lid.
- **PLACE** one unit from your lid to your home row.
- **ACTIVATE** one unit already on the board. When you activate a unit, that unit can do one movement action and one special action.
- **UNFREEZE** one unit that has been scared or webbed. Turn that unit right side up.

Movement actions:

MOVE: Move up to the move value on the board (non-diagonal moves only). You cannot move through or land on an obstacle square or a square with another unit.

FLY: Just like jump, except you can end your movement on an obstacle. You can never end your movement on top of another unit.

JUMP: Just like move, except that you can move over squares with obstacles and other units. You have to end your movement on an empty square.

PUSH: Push is the same as move, except that a pushing unit will push other units around the board if it bumps into them. Remember that a unit can push more than one unit at a time, and if units get pushed into walls and obstacles, they will be deconstructed.

Special Actions:

CARRY: As you move, you can pick up an adjacent unit and then put it down in an adjacent square when you have finished moving. You can only put down the unit being carried in a square that the unit could normally occupy.

REPAIR: Heal 1 adjacent unit up 1 level. Repair ends your turn.

SCARE: Scare is an ability that allows a unit to freeze another unit. At the end of a player's turn, any unit with the Scare action freezes any adjacent enemy units. The frozen targets are flipped upside down, and cannot be activated or use any ability until they have been unfrozen. Freezing a unit does not cause it to lose any bricks.

DECONSTRUCT: Take an adjacent unit down 1 level. Deconstruct +1 takes a unit down 2 levels. A ranged deconstruct has a range in square (so Decon R2 can deconstruct exactly 2 squares away). Using the deconstruct action ends your turn.

EAT: Deconstruct any adjacent level 1 unit and go up 1 level. You can only eat a unit that is already at level 1. If you are at your maximum level you can still eat, but there is no repair effect. Eating ends your turn.

WEB: Web is a special action that allows a unit to Freeze another unit. To do so, the unit must be two spaces away from the target and end its turn with the Web action. The target is flipped upside down, and cannot be activated or use any ability until it has been unfrozen. Freezing a unit does not cause it to lose any bricks.

X-Tra cards

You can play up to one X-Tra card on your turn. When you play one, discard it face-down next to the board.

Scoring & Winning

As soon as you move one of your units into your opponent's home row, you immediately score. Take one brick from the scoring unit and put it in your X-Pod to keep score. When your opponent scores, if you have used any of your X-Tra cards, you can take one back into your hand.

To win, be the first to move three of your units into your opponent's home row.

Starting options:

AlphaBot
ExtendoBot
Fixit

JumpBot
ExtendoBot
Patroller

BrainBot
Patroller
Sparks

X-TRA

DECON +1

Play this X-tra when you have finished moving a unit.

This turn, the unit gains +1 level to its deconstruct action. A unit without the deconstruct action will get a normal deconstruct ability from this card.
